

Muhammad Ali Asif

Full Stack Software Engineer

Lahore, Pakistan | +92 331 4835133 | mohammadali6918773@gmail.com | [LinkedIn](#)

SUMMARY

Full Stack Software Engineer with 4+ years of experience designing and delivering scalable web and cross-platform applications for production environments. Skilled in building modern software solutions using React, React Native, Next.js, Node.js, TypeScript, and FastAPI, leading initiatives from architecture and implementation through deployment and continuous improvement. Brings expertise in scalable system design, API development, real-time applications, AI integration, and engineering best practices to deliver resilient, business-focused solutions.

EXPERIENCE

Software Engineer

July 2025 – August 2026

Wisdom IT Solutions

Lahore, Pakistan

- Design and develop scalable web and cross-platform applications using React.js, React Native, Next.js, TypeScript, and JavaScript.
- Integrate RESTful API endpoints, authentication flows, payment gateways, push notifications, and real-time features to support production-grade user experiences.
- Improve application performance through efficient state management, code optimization, and debugging to enhance responsiveness and stability.
- Collaborate with product managers, designers, and backend engineers in Agile Scrum ceremonies to plan sprints, review code, and ship production releases.
- Maintain scalable architecture, reusable components, and CI/CD workflows to support reliable and consistent deployments.

Software Engineer

August 2024 – June 2025

Jarvis Technologies

Lahore, Pakistan

- Maintained a production React Native mobile application and a web application built with React.js and Next.js, focusing on scalable architecture and maintainable code.
- Developed responsive UI screens and integrated RESTful API endpoints using React Native, React.js, Next.js, Node.js, Redux, and Firebase.
- Optimized mobile and web application performance through debugging, efficient state management, and code refactoring.
- Delivered production releases using Agile Scrum methodologies while upholding high code quality, accessibility standards, and consistent user experiences across mobile and web platforms.

Mobile Application Developer

January 2022 – July 2024

Cyber Advance Solutions

Lahore, Pakistan

- Developed and shipped mobile application features aligned with user needs and business goals.
- Collaborated with product managers, UI/UX designers, and backend developers to define requirements, translate user stories into working features, and resolve state management issues using Redux.
- Resolved technical challenges by optimizing API calls with Axios and improving app navigation using React Navigation.
- Contributed to brainstorming sessions and problem-solving discussions to build scalable and efficient mobile app solutions.
- Integrated third-party libraries and APIs, including payment gateways, push notifications, social media logins, and analytics tools, to deliver seamless functionality.

PROJECTS

Tasky - AI-Powered Services Marketplace (Web and Mobile Platform)

- Built a full-stack services marketplace across web and mobile using Next.js, React Native, and Node.js, with authentication, dynamic routing, and real-time updates.
- Designed REST APIs and a company onboarding flow supporting organizational collaboration and workflow tracking.

AI Surveillance System

- Built an AI-powered surveillance dashboard with Next.js and FastAPI for real-time safety and compliance monitoring, covering helmet non-compliance, line-crossing, and bottle inspection detection.
- Designed a scalable Node.js and Python backend for live video analytics and real-time violation tracking.

EDUCATION

Minhaj University	Lahore, Pakistan
Bachelor of Science in Information Technology	2020 – 2024

TECHNICAL SKILLS

- Languages:** JavaScript, TypeScript, Python, SQL
- Frameworks and Libraries:** React Native, Next.js, React.js, Node.js, Express.js, FastAPI, Redux, Zustand, Context API, Vue
- Data and Backend:** PostgreSQL, Firebase, REST APIs, Axios
- Engineering and Delivery:** Git, JIRA, Agile Development, Docker, CI/CD Pipelines, System Monitoring, Debugging
- Testing and Quality:** Unit Testing, Performance Tuning, Accessibility Best Practices
- GenAI and Agents:** OpenAI API, GPT-4o, Responses API, OpenAI Agents SDK, Anthropic, Claude Code
